Instructions: Please read carefully

- Submit the file by **Friday** in your **github repository** in **Lab task 7 folder. If you cannot complete the full task, do not worry. Just upload what you have completed.**
- **You must upload a screenshot of each task's output also (browser view)**
- You can take help from your classmates or internet but don't copy from them. Its important for you to learn

---

EXPERIMENT NAME

Applying Basics and intermediate concepts of CSS.

OBJECTIVE

This LAB is dedicated for providing a tutorial that will cover the basics and intermediate concepts of CSS and how to apply it to design web pages thoroughly.

ASSESSMENT TASK

- Apply Basic CSS on at least **5 different pages** each person in a group from your Project.
- Web pages must be responsive depending on browser compatibility and mobile view. (Preferably Media-Queries. But you may use any frontend framework as well)
- Must maintain an external stylesheet (style.css). Also comment on the CSS code.
  Example:
  /* for background red*/
  .back-red{
      background : red;
  }
